### **Dowdens Pumping and Water Treatment awarded PSG importation and distribution contract**

Dowdens Pumping and Water Treatment are proud to announce that PSG Dover has awarded them the PSG Wilden importation and distribution rights for Wilden Double Diaphragm pumps, Griswold & System One Centrifugal pumps, and Abaque Peristaltic pumps and products for the Australian manufacturing, industrial and mining markets.

An extensive range of genuine pumps and replacement parts for the entire Wilden range can be found in our warehouses and repair centres located in Brisbane and Mackay (QLD).

These warehouses and repair centres are permanently open for inspection to any of our valued customers.

For many years now Dowdens Pumping and Water Treatment have been popular suppliers and repairers of Wilden pumps to the manufacturing, industrial and mining industries and are now able to enrich what we do through the establishment of a sustainable pricing structure and the widespread distribution of reliable, genuine Wilden equipment.

Dowdens Pumping and Water Treatment staff has ample experience within the Australian manufacturing, industrial and mining industries - enabling us to work through multifaceted budgets and achieve considerable savings wherever possible.

Soon Dowdens representatives will personally present this new distribution structure to customers and explain what potential savings will be available as a result of this exciting new partnership.

The individual needs of any mine, plant or business within Australia can be met via our broad product range, sustainable pricing structure and specialised services.

Dowdens Pumping and Water Treatment, in partnership with Wilden, System One, Griswold and Abaque have the ability to deliver complete and specialised long-term engineered solutions that are practical and innovative, ensuring clients benefit from greater productivity and reduced downtime.

Please contact us should you wish to speak with our in-house Wilden representatives and find out how we can help your company attain significant savings now and into the future.
